Introduction

This report presents key information about marriages and divorces that occurred in Wisconsin in 2002. It also contains information from selected previous years, as well as information on the number and rate of marriages and divorces, both in Wisconsin and nationally. The sources of data for Wisconsin are marriage and divorce certificates on file with the Bureau of Health Information, Division of Health Care Financing, Department of Health and Family Services.

The collection of marriage and divorce data is mandated by Chapter 69 of the Wisconsin Statutes. Chapter 69 authorizes the Department of Health and Family Services to supervise and direct the collection of these data. This statute also specifies how local registrars are to collect and file certificates of marriage. Samples of the marriage and divorce certificates are included in the Technical Notes.

The Department of Health and Family Services produced this publication. Staff of the Vital Records Registration and Statistics Unit, Bureau of Health Information, collected and compiled the marriage and divorce records. Joyce Knapton drafted the summaries in this report and produced the computer programs to generate the tables. Patricia Nametz edited the report. The report was prepared under the supervision of John Kiesow, State Registrar, Vital Records Section, and Jane Kraus, Supervisor, Registration and Statistics Unit. John Chapin, Director, Bureau of Health Information, provided overall direction.

The Bureau of Health Information would like to thank the County Clerks for issuing accurate marriage licenses and the local Register of Deeds offices for their accurate recording of all marriage records.

This report is also available on the Department of Health and Family Services Web site, at www.dhfs.state.wi.us/stats.

Key Findings

- A total of 34,241 marriages occurred in Wisconsin in 2002, representing a decrease from the 34,790 marriages that occurred in 2001. These counts reflect all marriages that occurred in Wisconsin (of both residents and non-residents of the state).
- Wisconsin's marriage rate in 2002 was 6.3 per 1,000 total population, lower than the 2001 rate of 6.5 per 1,000 and continuing the gradual decline that began after 1980 when the rate was 8.7 per 1,000.
- The marriage rate in Wisconsin has been consistently lower than the national rate for more than 80 years. In 2001, the United States marriage rate was 8.5. The 2002 United States marriage rate was unavailable at the time this report was compiled.
- The median age for first marriages in 2002 was 24.8 years old for women and 26.3 years old for men. In 1960, the median age at first marriage was 20.4 for brides and 22.9 for grooms.
- Since 1960, the bride in a first marriage, on average, has been approximately two years younger than the groom.
- In 2002, the months with the highest number of marriages were June, August and September. June was the most popular month to marry.
- Milwaukee County had the highest number of marriages in 2002 (5,187), followed by Dane County (2,858), Waukesha County (2,329), and Brown County (1,659). These are Wisconsin's four most populous counties. Each of these counties had an increase in the number of marriages from 2001 to 2002 except for Milwaukee County, where marriages decreased by more than 200.
- A total of 17,471 divorces occurred in Wisconsin in 2002, for a divorce rate of 3.2 per 1,000 total population. This is slightly lower than the 2001 rate (3.3).
- The divorce rate in Wisconsin has been consistently lower than the national rate for more than 80 years. In 2001, the United States divorce rate was 4.0 per 1,000 total population. The 2002 United States divorce rate was unavailable at the time this report was compiled.
- In 2002, the total number of Wisconsin divorces was 51 percent of the total number of Wisconsin marriages. This is higher than the 2001 percentage (50 percent).
- The highest number of divorces occurred in Milwaukee County (2,689 divorces and 9 annulments), followed by Dane County (1,428 divorces and 6 annulments) and Waukesha County (1,006 divorces and 1 annulment), reflecting the large populations of these three counties.
- Fifty-five percent of all Wisconsin divorces in 2002 involved families with children under 18 years of age. Among divorces involving families with children, an average of 1.8 children were affected by each divorce.

Note: The median age is one way of expressing the average age, and represents the midpoint of all persons in the group (half are older and half are younger than the median age). For example, in 1995 the median age for brides at first marriage was 24.5, meaning that half of all brides being married for the first time in 1995 were younger, and half were older, than 24.5. The numbers in this table reflect all marriages that occurred in Wisconsin in the stated years.

- The median age for first marriages in 2002 was 24.8 years old for women and 26.3 years old for men. In 1960, the median age at first marriage was 20.4 for brides and 22.9 for grooms.
- Since 1960, the bride in a first marriage, on average, has been approximately two years younger than the groom.
